Subject Index of Volume 219

Adsorption
  photo-induced regulation of nematic liquid crystal alignment by mixed monolayers of an azobenzene with long chain alkyl residues, 226
Aluminium
  investigation of the microfrictional behavior of C_{60} particle layers on aluminum, 129
  fabrication of organic–inorganic pseudosuperlattice, 236
  hillock growth on aluminum and aluminum alloy films, 80
  induced crystallization of amorphous silicon film in contact with aluminium, 1
Aluminium oxide
  serial cosputtering of mixed Al/Zr and Al_2O_3/ZrO_2 films, 46
Anisotropy
  effect of substrate on growth of WS_2 thin films, 30
Anodic oxidation
  formation and dissolution behaviour of ZrO_2 film in H_3PO_4 acid solutions, 146
Argon
  diamond-like amorphous carbon films prepared by r.f. sputtering in argon: electron-assisted investigations, 109

Cadmium sulphide
  microstructure of polycrystalline $CuInSe_2$/Cd(Zn)S heterojunction solar cells, 183
  photoluminescence and Raman studies of CdS films grown by metal–organic chemical vapour deposition on Si{111} substrates, 153
Calcium
  a.c. impedance investigation of Ta_2O_5 film for use as a storage capacitor dielectric, 176
Carbon
  investigation of the microfrictional behavior of C_{60} particle layers on aluminum, 129
  diamond-like amorphous carbon films prepared by r.f. sputtering in argon: electron-assisted investigations, 109
  influence of selected process parameters on the deposition of polymer-like amorphous hydrogenated carbon films in glow discharges, 119
Chemical vapour deposition
  kinetics of chemical vapor deposition of tungsten carbide, 103
  plasma-assisted chemical vapour deposition of diamond by hollow cathode arc discharge, 4
  effect of mercury UV photolysis on vapour deposition of SnO_2, 170
Chromium
  evaluation of tetra-alkylchromium precursors for organometallic chemical vapor deposition. II: Unusual low temperature chromium carbide deposition from $Cr[C(CH_3)_3]_4$, 24
Coatings
  determination of elastic modulus and thickness of surface layers by ultrasonic surface waves, 92
  effect of solvent on properties of sol–gel-derived TiO_2 coating films, 18
  kinetics of chemical vapor deposition of tungsten carbide, 103
Conductivity
  method for the determination of the thermal transport properties of submicron-thick dielectric films with the use of an analytical expression, 239
Copper
  interaction of NO_2 with copper phthalocyanine thin films. I: Characterization of the copper phthalocyanine films, 244
  interaction of NO_2 with copper phthalocyanine thin films. II: Application to gas sensing, 251
Crystallization
  induced crystallization of amorphous silicon film in contact with aluminium, 1

Deposition process
  energy considerations for preparing thin films by ion beam deposition, 266
  serial cosputtering of mixed Al/Zr and Al_2O_3/ZrO_2 films, 46
Depth profiling
  determination of elastic modulus and thickness of surface layers by ultrasonic surface waves, 92
Diamond
  plasma-assisted chemical vapour deposition of diamond by hollow cathode arc discharge, 4
Dielectric properties
  a.c. impedance investigation of Ta_2O_5 film for use as a storage capacitor dielectric, 176
Dielectrics
  method for the determination of the thermal transport properties of submicron-thick dielectric films with the use of an analytical expression, 239
Diffusion
  anisotropic grain growth of δ-NiMo compound by exothermic solid state diffusional intermixing, 52

Elastic properties
  determination of elastic modulus and thickness of surface layers by ultrasonic surface waves, 92
Electrical properties and measurements
  effects of substrate temperature, deposition pressure and thickness on the morphology of ultrathin platinum film on SiO_2/Si substrate, 257
  structural and electrical properties of ion beam sputter deposited tantalum films, 206
Electrochemistry
  "all-gel" electrochromic device, 193
  formation and dissolution behaviour of ZrO_2 film in H_3PO_4 acid solutions, 146
Electronic devices
  Langmuir–Blodgett mono- and multilayers of fluorocarbon amphiphilic polymers and their application in photogalvanic metal–insulator–semiconductor structures, 215
Epitaxy
  exitaxial growth of long chain esters prepared by physical vapour deposition, 231
  thermodynamic aspects of pyrite film formation by sulphur conversion of iron, 37
Ethanol
  effect of solvent on properties of sol–gel-derived TiO_2 coating films, 18
Evaporation
  fabrication of organic–inorganic pseudo superlattice, 236

Gadolinium
  diffusion parameters for oxygen and gadolinium at gadolinium/metal interfaces, 87

0040-6090/92/$5.00

© 1992 — Elsevier Sequoia. All rights reserved

Germanium
excimer laser ablated deposition of ferroelectric lead germanate thin films, 162
Glow discharge
influence of selected process parameters on the deposition of polymer-like amorphous hydrogenerated carbon films in glow discharges, 119
Growth mechanism
anisotropic grain growth of δ-NiMo compound by exothermic solid state diffusional intermixing, 52
thermodynamic aspects of pyrite films formation by sulphur conversion of iron, 37

Halides
second-harmonic generation in hemicyanine Langmuir–Blodgett monolayer deposited from aqueous subphase of halide salt solution, 221
Hardness
on the chemical and mechanical properties of sputtered silicon nitride films, 139
High energy electron diffraction
growth and characterization of Nb/Gd multilayers for different substrate temperatures, 69

Ion bombardment
energy considerations for preparing thin films by ion beam deposition, 266
Ion plating
energy considerations for preparing thin films by ion beam deposition, 266

Kinetics
kinetics of chemical vapor deposition of tungsten carbide, 103

Langmuir–Blodgett films
surface plasmon resonance as a probe of the complexing process of valinomycin Langmuir–Blodgett films by potassium ions, 210
Langmuir–Blodgett mono- and multilayers of fluorocarbon amphiphilic polymers and their application in photogalvanic metal–insulator–semiconductor structures, 215
second-harmonic generation in hemicyanine Langmuir–Blodgett monolayer deposited from aqueous subphase of halide salt solution, 221
Laser ablation
excimer laser ablated deposition of ferroelectric lead germanate thin films, 162
Lead
excimer laser ablated deposition of ferroelectric lead germanate thin films, 162
Luminescence
photoluminescence and Raman studies of CdS films grown by metal–organic chemical vapor deposition on Si{111} substrates, 153

Mercury
effect of mercury UV photolysis on vapour deposition of SnO_2, 170
Molybdenum
anisotropic grain growth of δ-NiMo compound by exothermic solid state diffusional intermixing, 52
Multilayers
growth and characterization of Nb/Gd multilayers for different substrate temperatures, 69
Langmuir–Blodgett mono- and multilayers of fluorocarbon amphiphilic polymers and their application in photogalvanic metal–insulator–semiconductor structures, 215
X-ray characterization of Au/Ni multilayer thin films, 63

Nanostructures
effects of substrate temperature, deposition pressure and thickness on the morphology of ultrathin platinum film on SiO_2/Si substrate, 257
Nickel
anisotropic grain growth of δ-NiMo compound by exothermic solid state diffusional intermixing, 52
Niobium
structural and electrical properties of ion beam sputter deposited tantalum films, 206
Nitrogen dioxide
interaction of NO_2 with copper phthalocyanine thin films. I: Characterization of the copper phthalocyanine films, 244
interaction of NO_2 with copper phthalocyanine thin films. II: Application to gas sensing, 251

Optical properties
photo-induced regulation of nematic liquid crystal alignment by mixed monolayers of an azobenzene with long chain alkyl residues, 226
optical properties of evaporated small silver particles, 199
optical properties of selective reflection TiN_x films, 157
Organic substances
photo-induced regulation of nematic liquid crystal alignment by mixed monolayers of an azobenzene with long chain alkyl residues, 226
fabrication of organic–inorganic pseudo superlattice, 235
Organometallic vapour deposition
evaluation of tetra-alkylchromium precursors for organometallic chemical vapor deposition. II: Unusual low temperature chromium carbide deposition from $Cr[C(CH_3)_3]_4$, 24
photoluminescence and Raman studies of CdS films grown by metal–organic chemical vapor deposition on Si{111} substrates, 153
Oxides
a.c. impedance investigation of Ta_2O_5 film for use as a storage capacitor dielectric, 176
formation and dissolution behaviour of ZrO_2 film in H_3PO_4 acid solutions, 146
Oxygen
diffusion parameters for oxygen and gadolinium at gadolinium/metal interfaces, 87

Photochemical vapour deposition
effect of mercury UV photolysis on vapour deposition of SnO_2, 170
Physical vapour deposition
growth and characterization of Nb/Gd multilayers for different substrate temperatures, 69
Plasmons
optical properties of evaporated small silver particles, 199
Platinum
characterization of TiO_2 films modified by platinum doping, 7
effects of substrate temperature, deposition pressure and thickness on the morphology of ultrathin platinum film on SiO_2/Si substrate, 257
Polymers
Langmuir–Blodgett mono- and multilayers of fluorocarbon amphiphilic polymers and their application in photogalvanic metal–insultor–semiconductor structures, 215

Potassium
surface plasmon resonance as a probe of the complexing process of valinomycin Langmuir–Blodgett films by potassium ions, 210

Reflection spectroscopy
optical properties of evaporated small silver particles, 199

Scanning electron microscopy
hillock growth on aluminum and aluminum alloy films, 80
Selenides
microstructure of polycrystalline $CuInSe_2$/Cd(Zn)S heterojunction solar cells, 183
Semiconductors
effect of solvent on properties of sol–gel-derived TiO_2 coating films, 18
photoluminescence and Raman studies of CdS films grown by metal–organic chemical vapor deposition on Si{111} substrates, 153
Silicon
induced crystallization of amorphous silicon film in contact with aluminium, 1
internal stress, thermal expansion coefficient and bi-elastic modulus of photochemically vapour deposited hydrogenated amorphous silicon films, 135
Silicon nitride
on the chemical and mechanical properties of sputtered silicon nitride films, 139
Silver
optical properties of evaporated small silver particles, 199
Solar cells
microstructure of polycrystalline $CuInSe_2$/Cd(Zn)S heterojunction solar cells, 183
thermodynamic aspects of pyrite film formation by sulphur conversion of iron, 37
Sputtering
diamond-like amorphous carbon films prepared by r.f. sputtering in argon: electron-assisted investigations, 109
energy considerations for preparing thin films by ion beam deposition, 266
Monte Carlo simulation of high rate reactive sputtering of tin oxide in planar d.c. magnetron systems, 270
on the chemical and mechanical properties of sputtered silicon nitride films, 139
serial cosputtering of mixed Al/Zr and Al_2O_3/ZrO_2 films, 46
structural and electrical properties of ion beam sputter deposited tantalum films, 206
Sulphides
effect of substrate on growth of WS_2 thin films, 30
thermodynamic aspects of pyrite film formation by sulphur conversion of iron, 37
Superlattices
fabrication of organic–inorganic pseudosuperlattice, 236
Surface and interface states
photo-induced regulation of nematic liquid crystal alignment by mixed monolayers of an azobenzene with long chain alkyl residues, 226
Surface morphology
effects of substrate temperature, deposition pressure and thickness on the morphology of ultrathin platinum film on SiO_2/Si substrate, 257
epitaxial growth of long chain esters prepared by physical vapour deposition, 230
hillock growth on aluminum and aluminum alloy films, 80

Tantalum
a.c. impedance investigation of Ta_2O_5 film for use as a storage capacitor dielectric, 176
structural and electrical properties of ion beam sputter deposited tantalum films, 206
Tin oxide
Monte Carlo simulation of high rate reactive sputtering of tin oxide in planar d.c. magnetron systems, 270
effect of mercury UV photolysis on vapour deposition of SnO_2, 170
Titanium carbide
determination of elastic modulus and thickness of surface layers by ultrasonic surface waves, 92
Titanium nitride
optical properties of selective reflection TiN_x films, 157
Titanium oxide
"all-gel" electrochromic device, 193
characterization of TiO_2 films modified by platinum doping, 7
effect of solvent on properties of sol–gel-derived TiO_2 coating films, 18
Transmission electron microscopy
microstructure of polycrystalline $CuInSe_2$/Cd(Zn)S heterojunction solar cells, 183
Transmission electron spectroscopy
epitaxial growth of long chain esters prepared by physical vapour deposition, 231
Tribology
effect of substrate on growth of WS_2 thin films, 30
Tungsten
effect of substrate on growth of WS_2 thin films, 30
Tungsten carbide
kinetics of chemical vapor deposition of tungsten carbide, 103

X-ray diffraction
X-ray characterization of Au/Ni multilayer thin films, 63
X-ray scattering
growth and characterization of Nb/Gd multilayers for different substrate temperatures, 69

Zirconium
formation and dissolution behaviour of ZrO_2 film in H_3PO_4 acid solutions, 146
Zirconium oxide
serial cosputtering of mixed Al/Zr and Al_2O_3/ZrO_2 films, 46
